

## Product Proposal #2

### Artifacts:

- 1.) To stay organized, I am going to label all the costume bags that we will be using and take pictures of each persons bag. I will also label the costume rack tags and take pictures of them on the rack that I will bring out.
- 2.) I am going to go shopping with my co-costume designer for the items we need that we don't have and actors aren't able to bring in/don't have. I will take a few pictures of us shopping and also take pictures of the items we bought and put a description of who the piece is for.
- 3.) I am going to add glow in the dark/UV paint to the aprons the main working girls are wearing for the show. I am going to document with pictures of me painting them and the process with the finished look.
- 4.) I am going to make a receipt of all the items we bought to show what we used of our budget.
- 5.) I am going to take pictures of our actors wearing full costumes during dress rehearsals so that we can see what they will look like for the show and caption them with the actors, their character and the scene.
- 6.) For this artifact, We will have pictures taken during the show of our actors in all their costumes, captioned with the actor, character and scene.
